TASK – 4 [Email Etiquette]

Email 1

Subject: A request for short extension in the deadline of VITyarthi project.

Respected Kannan Sir,

Sir I am writing this mail to request a short extension on the submission of VITyarthi Digital Literacy Project, whose current due date is 31st of March. Sir Unfortunately I got infected by jaundice in previous week and it has set me back from my studies over the last few days and it will take more 4-5 days to recover completely.

If possible, would I be able to submit my VITyarthi Digital Literacy Project work by 5th of April instead. I have already made some progress and I am committed to finishing it to a high standard as soon as I'm back on my feet. I can also provide a medical certificate if that would be helpful for your records.

Thank you very much for your time and sir please consider my request.

Best regards,

Kunal Shrinivas Pawar

Email 2

Subject: Internship Inquiry

Respected Kannan Sir,

I am Kunal Pawar, and I am a first-year B.Tech student at VIT Bhopal University. I am writing this email to express my interest in applying for a summer internship in your organization.

I have been building my skills and I am eager to apply what I've learned in a professional environment while contributing to your upcoming projects.

I am eager to learn and gain practical experience in the field of computer science. I would be grateful if you could inform me about any available internship opportunities and the application process.

Thank you for your time and consideration.

Sincerely,

Kunal Shrinivas Pawar
Registration Number: 25BCE10486
B.Tech 2025 batch/CSE Core

Checklist completeness

[here case of social media is taken]

Social Media Do's and Don'ts for College Students

The Do's ✅

1. **Do check your privacy settings for all apps:** some apps may misuse your personal information like phone number, email and others things without your concern so before giving any permission read all the things carefully .
2. **Make use a professional profile picture for all respective platforms:** On platforms like LinkedIn you must use such a profile picture in which you are wearing something formal and posing normally.
3. **Do think before you posting or uploading any information over internet:** First be sure that information will be helpful for in your future goal and they direct you towards your goal.
4. **Do engage positively in all types of environment:** Use all your accounts to post your achievements, participate in healthy academic discussions, and support your peers and whatever that defines as your skill.
5. **Do fact-check information:** Before directly taking and impling information directly you have to cross check it from any other alternative source.

The Don'ts ❌

1. **Don't post any kind of offensive content:** Avoid things which contain hate , harassing kind of words, or using inappropriate tone and language.
2. **Don't give access to location all the time:** Don’t post your exact location every time like you keep putting updates on social media keep them late for minimum 8-10 hours just for your safety.
3. **Don't engage in any kind of trollings:** If someone is trying to trouble or disturb intentionally, in that case it’s better that you don’t reply to whatever they say let them say whatever they want.
4. **Don't badmouth yourself just to stop someone doing wrong:** making use of unprofessional language lead for a bad impression and may give a negative review to the person viewing you at that point of time.
5. **Don't take someone’s ideas or words and pass them off as your own**

Scenario Write-up

For this task, I focused on the nuances of professional digital communication. I drafted a email: in which I requested an extension in project submission deadline. In that I aimed for a tone that was respectful and formal but still came across as a sincere human request rather than a template. I also compiled a social media checklist to help my peers understand that their online presence is essentially a digital resume.

Reflection on Communication Scenarios: I once read about a student who missed out on a high-tier placement simply because of their unprofessional email address: it was something like 'AdiMan123@email.com' and the subject line was also missing in his application. The recruiter assumed the student lacked attention to detail and didn't even open the attachment. This is a classic example of how poor digital communication can create a "gatekeeper" effect.

What could have been done differently is simple: using a professional university email, a clear subject line like "Application for Software Role ," and a polite greeting. It shows that you value the recipient's time and take the opportunity seriously. This task reminded me that in the digital world, your formatting and tone are your first impression.
